

# Tugas Asistensi

```
package sistemperpustakaan.service;

import sistemperpustakaan.model.User;

public abstract class ProsesServiceAbstract {

    public void initDataBuku() {
    }

    public void daftarBuku() {
    }

    public void register() {
    }

    public boolean login(String username, String
Password) {
        return true;
    }

    public void pinjamBuku(User user) {
    }

    public void daftarPinjam(String username) {
    }
}
```
